## PROFILE

I'm a software developer, I developed software based on multiple languages and most familiar with **web and android application** development. Have experience of user interface and user experience designing based on the customer requirement and planning and managing project for smart work done.

From the last **3 years developing web and android projects** for MCA and Engineering Students. My passion is solving problems through design, thinking, and ultimately came up with solutions that make the user happier and taking initiative to develop a better product and try to think out of the box and implement IT skills into project opportunities for better work done.

Now I'm looking for a leading role where I can design solutions based on the information technology that maps the user's requirements and business goals. I have done **MBA in Business Development and Marketing** and **Bachelor in Information Technology**. Try to implement those skills and improve proficiency.
