## Projects

- **RoboxaTech** (<https://www.roboxatech.com>)

RoboxaTech provides smart glass solutions to organisations which have warehouses, workshops and other facilities where the smart glass can be utilised for improving work quality, speed up the process. The Solution consists of the admin's portal which can connect to smart glasses via Video/Audio calls. It is capable of sharing Information, Files, Messages, AR marking on Video snapshot, Live video zooming within call.

### Project Implementations:

1. **Remote Assistance:** This application was intended to provide the smart glass solutions to bidirectionally connect the users (Technician/Expert)

who are at different locations. Using this solution the Expert can connect to Technician via video call from application, coordinate with him by sending snapshots of video, along with AR markings on them, share documents, keep evidence of calls.

2. **Roboxa Warehouse Solutions:** This application is implemented at warehouses where the Supervisor could send the picklist to Workers over the smartglass, and the Workers can update the progress of their progress from glass to Supervisor's dashboard.

- **Roles and Responsibilities**

Profile: Full Stack Developer.

- **Key Skills:** HTML, CSS, Javascript, jQuery, Bootstrap-v4, Angular, Node.js, MongoDB, Sockets.

- **Ulysses 4** (Product of Latize Group <https://www.latize.com>)

Ulysses is an analytical application, mainly focusing on big data analytics, finding relations between nodes using linked data. Ulysses 4 was upgraded from Ulysses version 3 with advanced filter capabilities, more complex structure of SPARQL queries, extremely customizable Dashboard Widgets.

- **Roles and Responsibilities**
