Retinodes Software Private Limited, Jabalpur.

Projects and professional Experience:

❖ **R-Auction**

This main purpose of this project is to create the Auction for various products of **Reliance**. The online auctioning system is a flexible solution for supporting lot- based online auctions. The system has been designed to be highly-scalable and capable of supporting large numbers of bidders in live Auction. The objective is to

develop a user-friendly auctioning site where any kind of product can be auctioned and provide value added services to the bidders and the sellers.

Roles and Responsibilities:

- Worked on Front end by using **Angular JS, React JS** and **JavaScript Frameworks**.
- Extensive use of **Angular.js** for developing the **SPAs** (Single Page Applications) for internal application/tool.
- Used Angular.js for connecting the API's using **Angular.js \$http service**.
- Used **Media Queries** for the design to be compatible in all devices.
- Responsible for **design** and **development** of the web pages from **mock- ups** (PSD).
- Implemented **Routers & History** in **Single Page App (SPA)**.
- Used the new tags from **HTML5** like section, article, header, footer, canvas for animations.
- Handled **cross browser/platform compatibility** issues (IE, Firefox, and Safari) on both Windows.
- Used **JIRA** to keep track of **bugs** to reduce **downtime, increase productivity**, and improve communication.

Environment: Angular7, Mongodb, nodejs, Visual Studio Code.

❖ **Hospital Managment System**

The purpose of this project is to develop a web application that can be used to keep track of the patients registering in a hospital. Also, this system should support features such as accessing the previous visit histories of any patient, search for patients by name and other attributes, etc.

Roles and Responsibilities:

- Working as a team member to understand the business requirements.
- Writing functionality to the forms using Angular.
- Fixing the defects raised by QA team.
- Involved in complete development from scratch for this product.
- Developing the components using with Angular and integrating the API services with user interface.
- Worked on Angular Routing concepts.
- Designing and customizing web pages using angular directives.
- Cooperating with the back-end developer in the process of building the RESTFUL API.
- **Develop core functionality with Angular framework and JavaScript.**

Environment: Angular6, MySQL, Visual Studio Code.

❖ **SHIVALOKA (Online shopping website)**

SHIVALOKA is a Bali-based spiritual lifestyle company spearheading the new trend of spiritually empowering jewelry that is sweeping across the world. Its online shopping site where people can shop RUDRAKSHA, BEADS & SACRED JEWELRY etc.
