PROFILE

Experienced Full Stack Developer with a specialization in React.js and a growing expertise in Node.js, MySQL, and MongoDB, offering over 2+ years of hands-on experience in crafting web applications. Experienced in creating dynamic user interfaces with React.js, and gaining proficiency in design RESTful APIs with Node.js and data storage and retrieval processes using both relational (MySQL) and NoSQL (MongoDB) databases.

EXPERIENCE

Movinture India Pvt. Ltd (August 2021 - Present)

Full Stack Developer

- Collaborated with cross functional teams to design and develop web applications that met client requirements and project specifications.
- Contributed to frontend development using React JS to create responsive and visually engaging user interface.
- Implemented backend functionally using Node JS to ensure seamless data management and application performance.

PREJECTS

Facility Management

(August 2023 – Present)

- Managed employee data and result in a web portal and mobile application based on customer requirements.
- Ensured seamless data presentation and accessibility for improved user experience.

Web Scraping

(June 2023 – August 2023)

- Developed a Python web scraping project to extract valuable information from a specific website.
- Utilized the BeautifulSoup library for HTML parsing and the requests library for making HTTP requests. Extracted structured data from web pages including texts and links.

Plastic Management

(January 2023 – May 2023)

- Contributed to the development of an application to manage customer details for a plastic recycling industry.
- Implemented features to schedule and collect plastic garbage from registered customers.

Diesel Generator Monitoring

(September 2022 – December 2022)

- Developed a Tablet/Mobile application using react native. Inspector will monitor and survey the Diesel generator.
- There are 16 parameters to survey.

Amazing Architecture

(April 2022 – August 2022)

- Developed a Mobile application using react native showcasing Indian monuments on a goggle map.
- Provided detailed information about selected monuments upon user interaction

TQI

(November 2021 – March 2022)

- This project is used for patient management. This system allows user to take the survey of patient and analyzes the reports.

SKILLS

- Strong proficiency in HTML, CSS, JavaScript including DOM manipulation, the JavaScript object model and familiar with newer specifications of EcmaScript.
- Thorough understanding of React JS and its core principles.
- Familiarity with React Bootstrap, React routing.
- Familiarity with RESTful APIs and implementing the APIs using axios.
- Basic knowledge of Redux and TypeScript.
- Knowledge of React Native, python.
- Knowledge of building the Rest API using Node JS with the express.
- Experience with both relational database like MySQL and non- relational like NoSQL.
- Familiarity with code versioning tool such as Git.
- Familiarity with tools like visual code, Postman etc.

CERTIFICATION

- Diploma in Web Designing
- Diploma in MySQL
- J2ee

EDUCATION

- **MSC. CS.**
Savitribai Phule Pune University
2022 – 2024 (Appearing)
- **BSC.CS.** (Secured 79.67%)
Shivaji University, Kolhapur
2017 – 2020

DECLARATION

I, Prajakta Dinkar Yelgave, hereby declare that the information furnished above is true to the best of my knowledge and belief.
