Savitribai Phule Pune University, Pune.

Percent: 68.72 %.

WORK DESCRIPTION

Software Engineer (Full Stack Developer)

(May 2018 - Present)

Exela Technologies

FOA - Front Office Automation

Team Size: 7

Technologies: Angular 4, HTML5, CSS3, Node JS, Mongo DB.

Details:

- Developed a web application to automate the on-boarding process of visitors at corporate offices.
- Front Office Automation is a business application developed to automate the process of event creation and guest user registration at the organization premises. Consequently, invitees will receive notification about the event through email where they will find unique generated URL link for event registration. After clicking on the link, guest will complete the registration process. At the event premises, the invited guest will have to obtain the badge for the selected event and therefore can check-in for the event. The application also has provisions for facility management, workflow generation, admin setup, event creation, vendor setup, and client setup etc. to facilitate the event creation lifecycle. Also, the application provides detailed reports about the attendees at respective facilities through various kinds of reports and visual representation of the user data through graphs and pie-charts.
- Worked closely with BA & QA teams to understand use cases and problem statements using agile/scrum.

Software Engineer (Full Stack Developer)

(May 2019- Present)

Exela Technologies
