## OBJECTIVE

Seeking a challenging job opportunity in a reputable company where I can leverage my skills, experiences, and goals to contribute to the company's growth. I aim to utilize my strengths to deliver exceptional results.

## SKILLS

Languages : JavaScript/TypeScript, C++

Development : ReactJs/NextJs, Redux, React Native, React Navigation, REST APIs, HTML, SCSS/SASS, Tailwind CSS

Technology : Git/Github, MongoDB/Mongoose, Figma

## PROJECTS

### GREAT QUOTES

JAVASCRIPT, REACT, FIREBASE

Developed a application uses **React** for building the user interface components for displaying quotes and comments, **Firebase** for storing and retrieving data. Overall, the project provides a simple and easy-to-use platform for sharing and discussing inspiring quotes.

### PERSONAL PORTFOLIO

JAVASCRIPT, REACT, FRAMER

Designed a Presonal Portfolio using **React** and **JavaScript**, **Framer** is used for creating animations and transitions, while **Iconscout** provides a library of icons that is used throughout the website. This portfolio provides a visually appealing and showcasing the developer's skills and projects.

### FOOD ORDER APP

JAVASCRIPT, REACT, FIREBASE

Created a Food Ordering Application user interface with features cart management that allows users to add and remove items. Implemented **Firebase** for storing and retrieving data and a checkout process that collects shipping information and completes the order.
