PROFESSIONAL SUMMARY

- A software developer with good experience in web Development and angular Designing, development, Bug Fixing, Unit testing.
- Better understanding of the domains like Airline, E-commerce and Banking,
- Involved in all SDLC phases such as analysis, requirement understanding, designing, development, testing and deployment.
- Designed microservice application with various functionality.

My Skill Set

- **Tech-Stack:** Data Structures, Algorithm, NodeJS, Angular, Rxjs, NgRx.
- **Languages:** Java, JavaScript, typescript, bootstrap, CSS, HTML5.
- **Tools:** Visual Studio code and Soap Ui.
- **Database:** SQL.
- **Project Management Tools:** Jira, Redmine.
- **Source Control/Version Control:** Git, AWS Code Commit, Bit Bucket.
- **Operating Systems:** Windows and Ubuntu.

Work Experience

June 2021 to present – Associate Software Engineer at TCS.

Projects:

ECO-JMB, Japan (jan 2022 to present)

- Implemented enterprise application of prime content experiment platforms using java, AngularJS, AWS.
- Designed and developed Micro-Fronted application and contributed in modules, where analysed and developed some critical stories within the deadline.
- Contributed to the accessibility development of an application by implementing screen reader compatibility, keyboard navigation, and ARIA landmarks, resulting in a 20% increase in usage by users with disabilities.
- Implemented Redux and RxJS concepts to manage the state and asynchronous behavior of a large-scale web application, resulting in a increase in application performance with quality code within enterprise scale development.
- Fixed UAT and E2E defects, by following various methodologies such as bug tracking and resolution, regression testing, and root cause analysis.
- Collaborating with the product management team to understand the business requirements and translate them into technical specifications.
- Participating in daily stand-up, sprint planning, sprint review, agile team and retrospective in scrum.

- Creating and executing unit tests and performing basic application testing.
- **Tech Stack:-** HTML,CSS, Bootstrap, JavaScript, Angular, AWS Code Commit, Sopa UI, Jira.

ADP , Japan(Jun 2021- Dec 2021

- Worked as a UI developer to integrate the booking engine with the airline's website using AngularJS and HTML/CSS.
- creating high-quality web-based user interfaces which have various functionalities like navigation, browser behaviour, session timeout.
- Analysed and fixed defects which were reported by the QA team. Providing the root cause analysis.
- **Tech Stack:-** HTML,CSS, Bootstrap, Typescript , Angular, Bitbucket, postman, Jira.

Academic Qualification

- 2021 – BE in Computer Engineering from Smt. Kashibai Navale college of Engineering, Pune. Graduated with 7.69 CGPA
- 2018 – Diploma In Computer Engineering From Government Polytechnic, Khamgaon. Completed with 82.20%.

Personal Projects

- My Ticket booking Application
 - Designed web application using angular version to enable logged in user to book travel ticket
 - Implemented functionality for bus search and availability of seats
 - Designed user friendly UI to confirm reservation
 - Tech: Angular, Typescript, HTML/CSS, Bootstrap, Git

Certificates

- Google Cloud Certified Associate Cloud Engineer (05/23 to 05/26).
- Angular Developer (12/2022) Angular certification training course (Edureka)
- Front-end Web Development in Angular (09/2021) by Coursera

Achievements

- On spot Awards (09/2022) received appreciation from manager for better performance and completing tasks within deadline.
- Hack The Crisis In India Online Hackathon Appreciation (07/2020) Solution for issues which were faced by public during pandemic
- Special Achievement Award (03/2023) Corporate Technology Talent Development Pillar
