PROFILE

Mobile front end Software developer with **five years** of experience in **iOS development** using **Swift**. Worked as a developer where I build an application with single handed following MVC and MVVM framework and SDLC life cycle in my initial days of career. Lead iOS team of 12 members in one of my previous organisation. Seeking for opportunity where I can use my skills and help in growth of company along with learning new skills.

SKILLS

iOS app development (UIKit, Swift, Auto layout, WebKit, Mapkit, XIB, Storyboard, Unit testing, Core Data),

Project management & Team leadership (requirement gathering, planning, agile methodology (scrum), meet deadlines, guide team, training of intern, JIRA create story & subtasks and divide into team),

Agile methodologies (Scrum, Service now, Digital AI),

Version control (GitHub using git commands & sourcetree),

Design patterns & Design architectures,

Clean code design (write reusable & clean code using Apple User Interface Guidelines),

Third party library Integration (Cocoa pods, Swift Package manager, Carthage),

Database (Core Data, SQLite, Firebase),

Analytics tools (Firebase, Site Catalyst, Amplitude analytics, Datadog),

Other Skills (SwiftUI, Java, Android)

PROFESSIONAL EXPERIENCE

BIRLASOFT Ltd, Application Developer

07/2022 – present

- Contributed to develop & design the features for the B-ONE Application.
- Following clean code architecture using MVVM architecture
- Involved in requirement gathering and client communication.
- Write the unit test cases for the modules.
- Manage the certificates & create the new certificates.
- Version control using Git with Sourcetree

ENJAY IT SOLUTION Ltd, Software Developer

09/2018 – 21/2022

- Plan the modules & features of the application.
- Develop & design the features.
- Swift 4: UIKit, Autolayout, TableView, CollectionView, CoreData, WebKit, MapKit.
- API integration using alamofire.
- Test each module & resolve if any bugs or errors are there.
- Enhance the application & improve the quality of code.
- Develop each module using different component of iOS and fulfill the requirements & deliver it on time.
- Firebase database integration.
- Cocoa Pods for the third-party integration
- Multi-threading & GCD
- Apple push notification.

- Rest API integration.
- Storage using database (SQLite), CoreData or local storage using user defaults.
- Offline storage & background activity.
- Create the certificates for Distribution & development.
- Deploy the applications on app store.
- Provide the technical support for iOS App.
- Do the root cause analyse the issue & provide the resolution for customer issues.
- Prioritise each task & bug incident using service now & digital AI.
- Monitor the activity using Intercom, Site Catalyst, Amplitude Analysis, Firebase & resolve the issue.
- Create the white label (modify the app name, client details on app store, change the any background or details for the specific client) for the application.
- Manage the iOS team of 6 members parallel with development along with providing training.
- Gather the requirements, co-ordinate with Project Manager, communication, observation & questionnaires and communicate with team regarding requirements.
- Divide the planned sprint tasks among team.
- Monitor the sprint to fulfil the deadlines using the Jira.
- Organise the team meeting regarding daily status & work on road blockers if any.

Associate Trainee
Training in iOS

07/2018 – 09/2018

EDUCATION

Gujarat Technological University,
Bachelor of Engineering

08/2014 – 06/2018

- Completed my graduation in Computer science engineering with 8.1 out of 10.
- I worked on one project in my degree "Railway Management", where I worked for front end mobile app using Android (Java).
