Key Projects

Krios Info Solutions Pvt Ltd Project:

1.CCM

- **Description:** The application is developed for Mahindra & Mahindra vendors and suppliers. There are various modules available in this App such as e-Parivartan, e-PartKosh, Dealer, Installer, AOFTR, SAR, Troubleshooting etc.
- **Technologies:** XCode 10.1, Swift 4.2
- **Role and Contribution:**
 - iOS Application Development
 - Worked on MVC architecture.
 - Implemented features to show the performance of app related modules in graphical format and create, edit/update and displaying details of the respective vendor and supplier.

2.Installation 2.0

- **Description:** Installation 2.0 is Mahindra & Mahindra's Tractor Installation Management App. There are two target audience in this app:

1) Installer:

- Installer can view/update the customer details. Here Installer can update tractor details i.e tractor usage, driver details, and Installation Check list.
- Installer can see the list of pending installation which are pending due to internet connectivity or unavailability of location.
- Here Installer can get the history of tractor installation done by him with date and Tractor sr. no.

2) Dealer:

- Dealer can view the Installer feedback given by customer
- Dealer can view Tractor List with Installation date and clicking on it display the customer and tractor details.

- **Technologies:** XCode 10.1, Swift 4.2

- **Role and Contribution:**
 - Mobile App Development and Web services Integration

Leo Technosoft Pvt Ltd Projects:

1. WikiReviews

- **Description:** WikiReviews will soon to be the largest community run business, movie, product, professional and actor review site. At WikiReviews the community is in charge from disputing reviews to voting on whether reviews should be deleted or filtered. Be a part of the largest social reviews network.
- **Technologies:** XCode 9.4, Objective C
- **Role and Contribution:** Development and Web Services Intergration.

Devise Apps Pvt Ltd Projects:

1. Stuff Organizer

- **Description:** Organize your stuff in a sophisticated way. Add items to containers which will be having horizontal scroll view to locate your stuff. Also print actual QR code and stick it on real containers and manage your stuff via application.
- **Technologies:** XCode 9, Objective C
- **Role and Contribution:** Development and Web Services Intergration.

2. Quick Test

- **Description:** Create a test in your own way. You will get result automatically after the test given by any person. Useful for quiz, puzzle, jingle, campaign, event, promotion, education, examination, interview, etc.
- **Technologies:** XCode 9, Objective C.
- **Role and Contribution:** Development and Web Services Intergration.
