## EXPERIENCE

### Deqode, Indore — Research and Development Engineer

July 2022 - PRESENT

Here are the key projects I've undertaken at DQ Labs, each demonstrating a range of technical skills and expertise:

1. **Ethos 2.0** - This project involved the development of a self-custody vault and a decentralized exchange. My role included the creation of data pipelines, proficiently utilizing tools such as Dagster and Python. I also played a pivotal role in building scalable backends by harnessing the power of NodeJs while designing robust system architectures..
2. **Alfred** - As part of the team, I contributed to the creation of India's pioneering copy trading platform for the crypto market. My responsibilities encompassed writing smart contracts using Solidity and employing Foundry to craft rigorous test cases for these smart contracts. This comprehensive engagement allowed me to gain a deep understanding of blockchain technologies and their practical applications.
3. **Safemoon NFT Marketplace** - In this project, I led the full-stack development effort, skillfully utilizing NodeJs, NestJs, NextJs, and Python to create an online platform for buying, selling, and bidding on NFTs, complete with NFT drop launches. Furthermore, my expertise extended to writing smart contracts for both EVM and Solana blockchains, showcasing my proficiency in cross-platform development and blockchain integration.

### Vibencode, Remote — Founding Software Developer/Designer

June 2021 - July 2022

At Vibencode, which I co-founded with 3 of my college friends, I was able to propel my skill in software development and software designing to greater heights. I upskilled my skill in working with NodeJs, Django and Angular to next levels and also I explored the field on UI/UX designing in this phase.

Create 2 awesome projects viz . Sleekemail -an innovative email management application that streamlined email organization with remarkable efficiency and SearchMerit - which provided insightful statistics about webpages.

### 3-2-1 Go Check, Remote (London) — Full Stack Developer

June 2021 - July 2022

3-2-1 Go Check is a digital background checking company for employees and tenants. During my time at 3-2-1 Go Check, I got experience working in an agile environment. Majorly working on the NodeJs, Tornado and Angular frameworks here, I also helped them start migrating their project to FastAPI and NextJs.

## SKILLS

### Programming Languages

TypeScript, Python, Rust, Solidity

### Frameworks/Libraries

NodeJs, NestJs, ExpressJs, ReactJs, NextJs, Django, Django-Rest Framework, Angular

### Other

Docker, Temporal, Postgres, MongoDB, Firebase, Redis, CI/CD, AWS, GCP, TimescaleDB, Cube, Terraform, Git, Figma

## EDUCATION

### Medicaps University

B.Tech - CSE 7.78 CGPA  
August 2018 - August 2022

### Trinity Convent Sr. Sec. School

PCM (12<sup>th</sup>) 8.1 CGPA  
August 2018 - August 2022

## LANGUAGES

Hindi, English
