☎ 7972820337

📍 Pune, MH

Career Objective

To associate with a progressive and growing organization where my skills are realized and my knowledge can be enhanced for the benefit of the organization as well as for personal development.

Profile

- 2+ years of experience as a front-end developer specializing in React.js, I have gained a solid understanding of modern web development practices and have honed my skills in creating interactive and responsive user interfaces.
- I have extensive knowledge of React.js and its ecosystem, including Redux and Context API for state management, React Router for navigation, and Axios for making API requests. I am proficient in JavaScript, HTML, and CSS, and I have a good understanding of ES6+ features and best practices.
- Throughout my experience, I have collaborated with cross-functional teams, including designers and backend developers, to transform wireframes and design mockups into fully functional web applications.
- Capable of self-learning to explore technical competencies.
