

# RESUME

**Name** : ARNAB KUMAR DEBNATH (FullStack Developer)

E-mail Address : arnab3111@gmail.com

GitHub : <https://github.com/arnab333>

Phone No.: (+91)7908299700

---

## Objectives

Intend to build a career with leading corporate of hi-tech environment committed & dedicated to people, which will help me explore my versatility and realise my full potential.

## Professional Proficiency:

### **Technologies :**

JavaScript

Git

Node.JS

React.JS

GitHub, GitLab

Express.JS

Redux.JS

NPM

MongoDB

JSON

MySQL

JSON Web Token

Mongoose

REST API

GraphQL API

Bootstrap

Single Page Applications

## Work Experience

<b>Freelancing</b>	2+ years.
--------------------	-----------

## My Works :

### The Movie App

**Project Outline :** This is a single page application for searching various Hollywood movies. The movie database has been provided by [TheMovieDB.org](https://www.themoviedb.org/), which has been integrated into the application. After searching for a movie, the user can see everything related to the movies, starting from budget to movie run time as well as all the leading actors and supporting ones.

**Technologies Used :** React.JS

### Burger Builder App

**Project Outline :** This was an application for a burger selling shop. The main feature of this application is that the user can add ingredients of their own choice. Other than that there was also payment integration, user authentication, signup, login, order history, etc.

**Technologies Used :** React.JS, Redux, MySQL, HTML, CSS, PHP, JWT

### DevConnector App

**Project Outline :** This is a social network application built for developers. Developers can create an account, create and update their profile as well as add their work experience and education details. They can also add a post like technical problems etc. and comment on other users' posts. Also if they provide a valid GitHub username, their latest 5 repositories will be shown on their profile. There is also the feature of personal chat as well as group chat.

**Technologies Used:** React.JS, Redux, Express.JS, MongoDB, REST API, Bootstrap, HTML, CSS

## **E-commerce Application**

**Project Outline :** This is an e-commerce application. The application has been built using React and Node. In this application we have added various e-commerce application features like cart, payment (using billdesk), order management, user management, product management etc. For security reasons, we have used JWT and Passport. For database we have used AWS. We have implemented **captcha** security for DDoS attack prevention.

**Technologies Used :** React.JS, Redux, Node.JS, Express.JS, MongoDB, Mongoose

## **Propitix**

**Project Outline :** This is a real estate application wherein we have added various features like user management, user rights management, website profile management (profile, social links, T & C, privacy policy - everything controlled from admin section), client side (home) components management from admin section. There was various real-estate plans for various services listed in the client side, and the users can opt for those services and see their purchase history, update their profile details etc. For security we have used JWT.

**Technologies Used :** React.JS, Redux, PHP, MySQL

## **Academic Qualification :**

COURSE	INSTITUTION	BOARD/UNIVERSITY	PERCENTAGE / CGPA
MSc-IT	BVDU-AMPLIFY DITM	BHARATI VIDYAPEETH UNIVERSITY	8.85 (CGPA)
BCA	BRAINWARE	PUNJAB TECHNICAL UNIVERSITY	69%

## **Personal Dossier :**

- Date of Birth : 12/08/1992
- Language Proficiency :

➤ **English** : Read ✓    Write ✓    Speak ✓

➤ **Bengali** : Read ✓    Write ✓    Speak ✓

➤ **Hindi** : Speak ✓

- Social Network Links :

➤ LinkedIn : <https://www.linkedin.com/in/arnab12/>
