- SIX SIGMA

Academic Projects :

1. Campus Collaboration Suite(ERP)

Platform – PHP
Scripting – JavaScript
Database – MySQL
Server – Apache
Description –

This project is about managing various activities in the college like Placement, Library, Courses, Examinations, Events, Content Sharing, etc. Basically its an ERP system for the college which covers all the important functions happens in the college.

2. Prison Management System

Platform – ASP.NET, HTML, CSS
Scripting – Java Script
Database – Microsoft SQL Server 2008
Server – IIS 5.0
Description –

In traditional way, there is not much security in handling criminal records, so by using this website a strong security is provided for effective management of the Prison.

3. Mantis [Bug Tracking System]

Language – ASP, HTML, CSS
Scripting – Java Script, VB Script
Database – Microsoft SQL Server 2008
Server – IIS 5.0
Description –

Basically this is a website useful for software industry, it shows how Developer and Tester can communicate with each other. Developer gets notification when any issue will found by tester, then developer manually check the bugs in the project assigned to him/her then solve it and resubmit to tester, due to this both developer and tester can communicate faster.
