Projects

ONLINE PIZZA ORDERING SYSTEM

The project “Online Pizza Ordering System (OPOS)” is developed in PHP, HTML, CSS, and bootstrap and Database used is MySQL server. The Online Pizza Ordering System's main purpose is to maintain track of information such as Item Category, Delivery Address, Order, and Shopping Cart details.

Only the administrator gets access to the project because it is totally built at the administrative level. The effort to create an online pizza ordering system aims to replace the manual method of taking orders with a digital one. The ability to rapidly and correctly create order summary reports whenever necessary is a key factor in the development of this project.
