## SUMMARY

An Associate level Frontend Developer is an entry-level professional with foundational knowledge in HTML, CSS, and JavaScript, focused on creating web interfaces. They assist in implementing website layouts, collaborate with backend developers, and work on user interface elements. Proficiency in responsive design, basic troubleshooting, and version control like Git is expected. Strong communication skills are essential for collaborating with team members and designers. As an aspiring web developer, continuous learning and adherence to coding standards are crucial for growth. This role serves as a stepping stone for further advancements in the dynamic field of web development.
