CAREER OBJECTIVE

To be a part of the dynamic software industry and providing best in class technical solutions to challenging business problems with customer centric approach maximizing value for the customer and organization.

EXPERIENCE SUMMARY

- 3+ of hands on experience in analysis, design and development of highly scalable and performant applications.
- Proficient in working with technologies including **ReactJs, React Native, NodeJs, GraphQL, JavaScript, ES, TS and JQuery**. Practice and understanding in **Python-Django, ASP.NET, Kotlin** and **Angular** development.
- Have worked on patterns like **Micro-services, Dependency injection, Redux, and MobX**.
- Worked on databases including **MongoDB, Sqlite, SQL Server, mysql**, etc.
- Have worked on tools like **webpack, ESLint, Babel, NPM and Yarn**.
- Experience in creating **user stories, requirement analysis** and **test cases**.
- Worked on creating and executing unit test cases using **Jest, Mocha, Enzyme**, etc.
- Worked on source controls like **Github, Gitlab, Bitbucket, Stash** and **TFS**.
- Experience working with **JIRA management tools** and **confluence pages** development.
- Functional domain experience involves **HealthCare** Insurance, **HomeCare** Management and **Retail Domain**.
- Efficient to work on **Firebase, Docker** container platform, **Heroku** cloud platform and **PM2 Runtime**.
- Process experience of **Agile** Methodologies.
- Have been focused on 360-degree career growth including **EQ, IQ, interpersonal, analytical** and **communication skills**.

SKILLS & ABILITIES

- Ability to produce best results under stressful situations and tight deadlines.
- Strong analytical and problem solving skills.
- Intrinsically motivated to learn things and have experience with various programming languages.
- Work Well Independently and Within a Team Setting.
- Efficient in conducting training sessions on JavaScript frameworks.
- Thrive in Dynamic, Fast-Paced Environment.
- Provide Technical assistance and groom freshers.
- Own client product and provide end to end deliverables.

EMPLOYMENT HISTORY

June 2016 - Present	Nitor Infotech, Pune Designation - Senior Software Engineer
---------------------	---

EDUCATIONAL QUALIFICATION

Educational Qualification		Board/University
SSC	89%	Maharashtra State Board
HSC	76%	Maharashtra State Board
BE (CSE)	72%	Shivaji University

PROJECT EXPERIENCES

Project Name	HomeCare Management Platform
Role	Senior Software Engineer
Team Size	10
Tools & Technologies	React-Native, React, Redux, GraphQL, Python-Django
Synopsis	By equipping caregivers with the right training and tools, lower the overall cost of care, reduce hospital admissions, and bend the cost curve of aging. Platform to manage and maintain hospice care agencies' activities.
Responsibilities	<ul style="list-style-type: none"> Design identical custom components for web and mobile. Design and develop mobile app using React-Native. Worked on upgrading RN version in application. Integrate real time data synchronization with Firebase. Expose services with graphql, wrapped over Django ORM. Bug Fixes and maintenance of web portal designed in Python-Django. Present demos in sprint end retrospective meetings. Active participation in all phases of project. Groom resources to be added in the team.

Project Name	mPOS (mobile Point of Sale) and Inventory Management Application Platform - Hackathon Winner Project
Tools & Technologies	React, Redux, Node-Express, MongoDB
Synopsis	The app aims at concluding the payment of items added to cart via shop-mate app (iOS application where user can scan the products' barcode to add them in cart and checkout at pos center with the code provided). This app also provides admin user privileges to manage the store inventory and receive notifications for the risk items.
Responsibilities	<ul style="list-style-type: none"> Develop the web frontend in React for POS and Inventory Management. Design custom components for handling form elements. Write services in Node using express and mongoose. Manage service data using Redux. Write unit tests. Document designed components using storybook.

Project Name	Health Intelligence App
Role	Software Engineer
Team Size	20
Tools & Technologies	ReactJs, React Native, Redux, Jest, Enzyme.
Synopsis	Health Intelligence is a product, which helps insurance providers track health of their members and ensures greater ROI based on health tracking and rewards
Responsibilities	<ul style="list-style-type: none"> Develop the web frontend in React. Develop mobile application in React native. Develop reusable infrastructure layer for both web and mobile using redux Bug Fixes and maintenance of application. Work on charts and graphs tracking user daily activities. Write test cases for react component and redux. Implement pre-commit hooks for static type checking and unit tests.

Project Name	Retail Dashboard Progressive Web App
Role	Software Engineer
Team Size	3
Tools & Technologies	Node, Express, Angular
Synopsis	Dashboard for a retail customer, which gives the mobile app experience when opened in a mobile browser
Responsibilities	Design and develop the web frontend in Angular 2. Design and develop application as a progressive web app. Ensure the performance and responsive behavior of app. Involved in requirement gathering and task planning. Documenting all the design documents.

Project Name	HRMS and AMS portal
Role	Trainee Analyst
Team Size	3
Tools & Technologies	ASP.net, Angular, MongoDB
Synopsis	Intranet Portal to manage HR, Administrative and Employee activities.
Responsibilities	Work on tasks including migration of currently build sharepoint application to Azure app (Leave Management System and Administrative Management System) Worked on Angular template and routing changes. Validate services for migration compatibility. Test workflow-model for worked modules

Other POCs:

1. **Visitor Management System:** Implemented the application using ASP.Net for keeping track of organisation visitors.
2. **Multi-tenant Host:** Kotlin with Vertx server for serving the configuration of respective tenant over the client sites
3. **JS POCs:** Work with junior resouces to build prototypes. Plan effort estimates, project use cases and stories. Divide work amongst team members. Follow work status daily with scrums and ensure code quality with reviews. Present projects in organizational meetings and to client visitors.

ACCOMPLISHMENTS

- Received **Nitor Brilliance Awards - Spot Prize** for client appreciation.
- Key contributor of **Nitor Hackathon Winner** team.
- Applauded with quarterly **Nitor Bravo - Applause award**.

PERSONAL DETAILS

DOB	5th May, 1994
Address	904, Mafco Company road, Gokhale Nagar, Senapati Bapat Road, Pune - 411016
