EXPERIENCE

COGNIZANT, PUNE
OCTOBER 2016- PRESENT
Working experience of 2.5+ years as a Frontend developer using Angular 2.0 framework, designed and developed complex telecom application. Specialized in Angular and responsive design using HTML5 elements along with CSS and Bootstrap.

ONSITE EXPERIENCE
Worked as a Frontend developer in Riga at client location. Was involved in the co-ordination between the Product Owners and the offshore team. Actively participated in providing and sharing the ideas with the BSS team about the future improvements in design and functionality.

PROJECTS

TELE2
- Implemented new design and functionality on the OACH application used in Tele2
- Implementing the search filter when there is large number of call, SMS or Data usage records
- Designed new template for logging panel which is used to log service request by the user
- Inline validation of the text field for new contacts and showing the error message
- DOM implementation and event binding

Recipe book and shopping list app (Web application)

To build this application Angular2 was used. The overall buildup of the project consists all the major concepts like Routing, service calling etc.
- Created different components and services so that ingredients can be pushed in the shopping list directly and can view them in detail
- Data is retrieved from the external API which shows the list of product
- Search and filter is implemented for easier sorting of the products

ROLES & RESPONSIBILITIES

- Worked within the Development team, to an Agile methodology
- Participation in design and code peer reviews
- Worked with web services including RESTful Web Services
- Understanding of business domain and implementing the requirements; Providing high quality deliverables while enforcing the development best practices
- Propose and introduce technical solutions in the area of responsibility, perform work breakdown, estimates
- Designed and developed GUI for application and modules using JavaScript

EDUCATION

LAKSHMI NARAIN COLLEGE OF TECHNOLOGY, BHOPAL.
B.E, ELECTRRICAL AND ELECTRONICS
From 2012-2016, CGPA- 7.8/10
