3 years 6 months(in swift Language)

ABOUT ME

Results-oriented software developer with ios development experience in both development and research positions. I make it my goal to create software with the user in mind, creating applications with a useable and intuitive user interface experience. I also understand the importance of creating highly readable and easily maintainable source code. I am constantly striving to learn new technologies and look to ways to better myself in this rapidly changing industry.

Sprintler lets you easily capture, share and discover live video as it happens.Instantly stream video and notify followers and friends.If you encounter a story, use Sprintler to stream live video.Invite others to watch your video in real-time.Build your audi- ence and follow other users.All streamed video is automatically stored online for future viewing and sharing.

Platform: iOS Programming(Swift)

Title: FreightPrint

Description:FreightPrint is an independent freight tracking system for tracking de- liveries. It is a third-party logistics tool which allows you to track customers' ship- ments in real time.The shipper's and the customer's addresses are also listed. Every bill of lading has its own unique tracking ID, which allows for drop-by-drop track- ing in real time. Customers' addresses may be saved for future use.Signatures showing proof of delivery are easy to log using FreightPrint. Each FreightPrint has the option to record a signature electronically at the time of delivery, as well as log notes regarding the shipment.

Platform: iOS Programming(Swift)
