VIGO TECHNOWORLD PVT. LTD.   *December 2017 - March 2018*

- Android App Developer
  Design and Development

I

TECHNICAL SKILLS

- Progaramming Languages : C, Core Java
- Database :Room, SQLite
- Web Development : HTML, CSS
- Operating System : Windows, Android
- Tools : Android Studio

PROJECTS

- **Text And Barcode Recognition System**

  The purpose of this application is to recognize text in text documents, text image and any picture taken by android based device and scan barcode for getting information behind barcode.

- **Visitor's Housing Security System**

  This application is to manage and maintain all society activities through mobile very efficiently. Automate your manual tasks at the society gate with visitors housing security system.

- **Automated Linen Tracking and Management through RFID tags**

  This application is an RFID linen management system, RFID tags are attached to each piece of laundry, and when the RFID tags move through the assembly line, an RFID reader sends an interrogating signal and reads the tags. When each tag is read, the application determines what type of textile is being read, and directs it to the proper area or machine. The application findings can be displayed on a screen so that a person can immediately direct the textile or linen to its next destination.
