## EDUCATION

**Bachelor of Technology**
Rajarambapu Institute of Technology
*2018 - 2022*                              *Islampur, Sangli, Maharashtra.*
                                           *CGPA 7.58*

**HSC**
SGM College of Science
*2017 - 2018*                              *karad, Satara, Maharashtra.*
                                           *Percentage 70.77%*

**SSC**
PGVP Highschool
*2015 - 2016*                              *Karad, Satara, Maharashtra.*
                                           *Percentage 90.00%*

## WORK

**Software Development Engineer**
Emtec.inc
*01/2022 - Present*                        *Pune ,Maharashtra.*
*Emtec, a digital IT consultancy, provides a comprehensive suite of IT services that empower your internal employees and provide an optimized digital service.*

*Achievements/Tasks*

- Developing responsive user interfaces using ReactJS and related libraries such as React Router. Developed and maintained web applications using Node.js, Express.js and Graphql, resulting in improved scalability and performance.
- Integrating the front-end with APIs and back-end services to enable seamless data flow.
- Implemented RESTful APIs to integrate with external services, improving data retrieval and enhancing user experience.
- Actively participated in agile development processes, including sprint planning, stand-ups, and retrospectives.
- Participated in deployment calls to address production issues and effectively resolved them through collaborative teamwork.
- Leveraged Git and GitHub for collaborative development.

## SKILLS

Nodejs    Reactjs    javascript    Typescript

kafka    graphql    MongoDb    HTML-CSS

## PROJECT DETAILS :

Mastermind (01/2022 - Present)

- MasterMind is a cloud-based SaaS solution that brings everything you need into one system. MasterMind is a logistic application used in several countries like USA, Canada, Mexico, etc.
- During my involvement in the logistic domain application, which operates across multiple countries and comprises several microservices on the backend and a mastery-fronted.
- frontend developing Mastery-frontend, Carrier- microservice, Employee-microservice. I contributed in developing and integrating **External API services** in backend.
- Worked on developing various fuctionalities of mastermind like on FE carrier , employee, load, offers, accounting sections and in that used mainly react hooks and some commonly build component by us for better code resue and UI.
- Developed endpoints for UI and internal services utilizing Node.js and Kafka.

## TOOLS

Lens:
*To monitor the health and efficiency of Kubernetes clusters. It provides insights into resource utilization, pod status, and performance metrics, enabling optimizatio*

Kafka UI:
*To create, delete, and modify Kafka topics. You can specify topic configurations, such as replication factor and partition count, and monitor topic details such as message throughput, latency, and partition distribution.*

New Relic:
*Detailed visibility into the performance of your application code, database queries, external services, and more.*

Insomnia:
*To easily construct HTTP requests by specifying the request method, URL, headers, parameters, body content, and other relevant details. It supports common request types like GET, POST, PUT, DELETE, and more.*
