Project Detail:-

1	Name	Online Voting System
	Description	This is a web page in which we create a voting system. We consider that all voters are pre-registered by admin when the voter login for voting he/she can give only one vote. This project developed for threat free and user-oriented Online Voting System. Online Voting System is made for the voters who want to vote or their favourite candidate sitting at home or from any location.
	Technology	Vb.net , ms-access
2	Name	Hostel Management System
	Description	"HOSTEL MANAGEMENT SYSTEM" is software developed for managing various activities in the hostel. For the past few years the numbers of educational institutions are increasing rapidly. Thereby the numbers of hostels are also increasing for the accommodation of the students studying in this institution. And hence there is a lot of strain on the person who are running the hostel and software's are not usually used in this context. This particular project deals with the problems on managing a hostel and avoids the problems which occur when carried manually. Identification of the drawbacks of the existing system leads to the designing of computerized system that will be compatible to the existing system with the system which is more users friendly and more GUI oriented.
	Technology	PHP, Mysql, CSS, Javascript
3	Name	Online Library System
	Description	Today most of t" library is using either manual system for tracking the day to day activity or they are using desktop, spread sheet like MS Excel application to manage the day to day activity. In this proposed JAVA Library Management System it will run in client server mode and user can check the book availability, they can search the books, library staff can issue, receive book, and management can check the report. System will store historical data. Management can anytime view the total book status, library card status. The eLibrary Management System is used to overcome the entire problem which they are facing currently, and making complete atomization of manual or semi automatic process of library management system. which is more users friendly and more GUI oriented.
	Technology	JAVA, MYSQL

Certification:-

Pursuing web development certification from CNC web world.
