# PROJECTS UNDERTAKEN

- Student Portal System: Student portal system provides information for an individual student where he can see all his marks, attendance and the dues what he/she have. The student marks will be updated by the respective faculty. Also data can be updated by either admin or by teachers only.

- Counterfeit Currency Detection:   We introduce a fake currency detection system that uses a camera to scan the currency. All this information will be transferred to the set of images processing algorithms layer by layer to perform operations on the result of the last stage.

- Online Bloodbank : A Browser-Based system that is designed to store, process, retrieve and analyse information concerned with the administrative and inventory management within a blood bank. This project aims at maintaining all the information pertaining to blood donors, different blood groups available in each blood bank and help them manage in a better way.
