ACADEMIC PROJECTS

FINAL YEAR PROJECT:

Title: An Improvement Of Backoff Algorithm Using Crowdsensing Approach For MANET's

Tools and Technology: NS2 Tool, AWK Script Analysis

Description: In this work we have shown the performance of backoff algorithm for MANETs. In simulation we have considered more number of hidden node scenario which is helpful to observe the performance parameter. We analyzed that increase in number of active transmitting nodes affects the performance of MANETs. Thus, we have identified the main problem of performance reduction of MANET.

MINI PROJECT:

Title: Hospital Management System
Tools and Technology: NetBeans, Java, Mysql

TECHNICAL SKILLS

- JAVA(Core, Advanced), Frameworks- Spring, Hibernate,
- MYSQL,
- HTML,
- CSS,
- C, C++,
- GITHUB.

FIELDS OF INTEREST
